About Me

Driven and enthusiastic aspiring electrician with a strong foundation in electrical engineering principles and a passion for learning. Eager to gain hands-on experience in electrical installation, maintenance, and troubleshooting while contributing to innovative and safety-focused projects. Committed to building a career in the electrical industry by leveraging my problem-solving skills, attention to detail, and dedication to excellence.

WORK EXPERIENCE

March 2024 – Feb 2025

Electrical Intern B2Gold Otjikoto, Namibia

- Assisting experienced electricians with the maintenance and repair of electrical equipment including motors, transformers, switchgears and control systems.
- Learning about preventative maintenance procedures and troubleshooting techniques.
- Conducting routine inspections and tests on electrical systems.
- Participating in the design, installations and commissioning of new equipment or systems.
- Conditioning field surveys and data collection for electrical projects.
- Learning about mine safety regulation and procedures.
- Assist with electrical drawing and schematics.
- Perform skilled technical work by repairing, work by repairing, changing out or reconditioning defective or worn out parts.

14 August 2025 – 31 January 2026

Operator : Packaging Namibia Breweries Limited

High-Speed Automation & Machinery

- Machine Specialization: Operating specific units like Depalletizers (unloading crates), Bottle Washers, Electronic Inspectors (checking for cracks/dirt), Fillers/Crowners, Labellers, and Shrink-wrappers.
- Changeover Management: Learning how to quickly reconfigure a line when switching from Windhoek Lager 330ml bottles to Tafel Lager 500ml cans. This develops mechanical agility and time management.
- SCADA & HMI Interfaces: Using digital touchscreens (Human-Machine Interfaces) to monitor line speed, pressure, and flow rates in real-time.
